Tender awarded by:	DATE OF COUNCIL MEETING	COUNCIL MINUTE NO.
Council Decision	24 August 22	0822.95
Name of Successful Tenderer(s):	MC Civil Contractors	
Amount of Successful Tender(s):	\$ 182,861.14 excl GST	

11.8 REQUEST FOR TENDER RFT2023-3 TIELINE ROAD

Date of Report: 16 August 2022

Business Unit: Infrastructure

Officer: Damon Lukins

Disclosure of Interest: Nil

ATTACHMENT

- Tender Assessment RFT2023-3 Tieline Road (*Confidential*)
- Tender Submission C Civil_Tieline Rd (*Confidential*)

PURPOSE OF THE REPORT

To consider the tender RFT2023-3 and to accept the submission that provides the best value to the Shire.

COMMENT

Four tenders were received from the following contractors;

- M C Civil Contractors
- Fulcher Contractors
- Fulton Hogan
- E K Contractors.

Tender assessments were carried out by Damon Lukins, Works Manager for the Shire of Gnowangerup and Danny Coleman from Coleman Consulting. (Refer to attached Tieline Rd Tender Assessment Page 1)

M C Civil had the lowest price of all 4 tenderers. (refer to Tieline Rd Tender Assessments Page 2 for costing details)

M C Civil did not complete the tender as requested, by failing to complete the rates column. Traffic management appears to be on the cheap side. Contacted M C Civil regarding this and they have stated they will use a mixture of contractors and their own Traffic Controllers who are all trained. They are happy with the price if we go to a site-specific plan.

Given the price, both assessors agreed that it is difficult not to recommend M C Civil Contractors.

CONSULTATION

Nil

LEGAL AND STATUTORY REQUIREMENTS

Due to the possibility of the estimated cost of the works exceeding \$250k it is a purchasing requirement to go to tender, pursuant to r.11 of the *Local Government (Functions and General) Regulations 1996*.

POLICY IMPLICATIONS

Nil

FINANCIAL IMPLICATIONS

The tender is within the budget allocation for the pavement construction.

ALTERNATE OPTIONS AND THEIR IMPLICATIONS

Nil

CONCLUSION

The recommendation is to accept the tender from M C Civil Contractors for the RFT2023-3

VOTING REQUIREMENTS

Simple majority

COUNCIL RESOLUTION

Moved: Cr R Kiddle

Seconded: Cr M Creagh

0822.95 That Council

Authorises the CEO to accept the tender RFT2023-3 from M C Civil Contractors for \$182,861.14 (GST excl) for the Shoulder Rehabilitation and Surface Preparation for Seal Works on Tieline Road.

UNANIMOUSLY CARRIED: 7/0

REQUEST FOR TENDER

Tieline Road Stage I

Shoulder Rehabilitation, Surface Preparation for Seal Works

SLK 36.29.00 To SLK 28.00 (Approximately)

Tender No. RFT2023-3

The Shire of Gnowangerup invites sealed Tenders from suitably qualified and experienced civil contractors to undertake:

Shoulder rehabilitation works, ready for bitumen seal on Tieline Road for an approximate distance 8.26 SLKs. It is expected for this work to occur during the usual construction period of early October 2022 onwards based on weather conditions.

Tender documents may be obtained from the Shire Administration Office at 28 Yougenup Road, Gnowangerup during the hours of 8.30am and 4.00pm Monday to Friday, before the close of the Tender. Alternatively, bidders can request an electronic copy by contacting Chelsea Why at the office on 9827 1007 or at gnpshire@gnowangerup.wa.gov.au.

Further information may be obtained from Geoff Carberry, Asset & Waste Management Coordinator, on 0499 899 423.

Tenders shall be valid for a period of 90 days after Tender opening and can be lodged in person in the Tender Box at the Shire Administration Office or emailed to gnpshire@gnowangerup.wa.gov.au on or before **2:00pm (AWST) Monday 1 August 2022**.

CONDITIONS OF TENDER

TENDER DOCUMENTS

The Tender Documents shall consist of the Tender Forms, Conditions of Tender, General Conditions of Contract, Scope of Work, Schedule of Prices and such other documents (except those provided for information only) as are issued for the purpose of Tendering and any other document specially referred to in the Notice of Acceptance as forming part of the successful Tenderer's offer.

VALIDITY

Tenders close at the office of the Principal by the date indicated on the Invitation to Tender. Tenders received after this closing date shall be rejected. Tender rates shall remain valid for 90 days from the closing date.

TENDER ENQUIRIES

Any enquiries regarding the Tender Documents, Scope of Works, etc should be referred to the Shire Manager of Works.

DISCREPANCIES, ERRORS AND OMISSIONS

Should the Tenderer find any discrepancy, error or omission in the Tender Documents he/she shall notify the Shire Manager of Works in writing on or before the closing date for the Tenders.

No explanation of amendment to the Tender Documents shall be recognised unless it is in the form of a written addendum thereto by or on behalf of the Principal.

TENDERER TO INFORM HIM(HER)SELF

The Tenderer shall inform him(her)self fully of all circumstances and conditions relating to the Contract and all risks and contingencies likely to affect his/her Tender. He/she shall satisfy him(her)self as to the correctness and sufficiency of his/her Tender.

Claims by the Contractor for extra remuneration on the ground of not being furnished with sufficient or accurate information will not be entertained.

SUBMISSION OF TENDER

The Tender Documents (Forms 1 to 4 inclusive) shall be completed in full by the Tenderer and submitted either:

- a) In a sealed envelope clearly marked with the Tender number and title, and delivered to the Tender Box at the Shire Admin Office; or
- b) Electronically in PDF format via email clearly stating the Tender number and title in the subject line.

The Tenderer shall not alter or add to the Tender Documents except as required by these Conditions of Tender.

The Tenderer shall sign the Tender forms where applicable, or if the Tenderer is a corporation, affix its common seal.

NOTE: The Tenderer is not to submit company profiles or brochures.

LODGEMENT OF TENDER

Tenders shall be lodged in the form stipulated by Submissions of Tender (above) of these conditions. It will be the responsibility of the Tenderer to ensure the email is submitted before the closing time of the Tender.

Tenders conveyed orally or by facsimile will not be considered.

INFORMAL TENDERS

Any Tender which does not comply with the requirements of these Conditions of Tender or the general Conditions of Contract may be rejected.

PREREQUISITES OF ACCEPTANCE

Notwithstanding any other requirements of the Tender documents, the Principal may, before accepting any Tender, ask the Tenderer to submit, in writing, any or all of the following:

- A statement as to the previous experience and achievements in performing similar or comparable work and the resources to be utilised in the completion of this work.
- Proof of skills levels, qualifications, experience and capability of employees and staff that will be utilised in the completion of this work.
- Provision of a copy of relevant licenses or authority necessary to execute the work under this Contract.
- Referees who can corroborate the information provided by the Tenderer.
- Any other information considered necessary by the Principal to aid in the evaluation of Tenders received.

Any submissions made by the Tenderer may be incorporated into the Contract.

Should the Tenderer fail to submit the required information with seven (7) days of a request to do so, the Tender may be treated as informal and then rejected.

SELECTION CRITERIA

The following criteria with percentage weightings will be taken into consideration in determining the successful tenderer:

Price and price structure (score lowest to highest (score 5-1))	50%
Past experience/performance working with contracts of similar nature (score 1-5)	30%
Past experience working in a local government environment (score 1-5)	20%

RISK MANAGEMENT & EVALUATION PROCESS

Evaluation will be made on the total Schedule of Rates sum that comprises the full team to perform the work as detailed in the Scope of Works. The Tender will be evaluated using information provided in your Tender. The following evaluation methodology will be used in respect of this request:

- a) Tenders are checked for completeness and compliance.
- b) **Tenders that do not contain all information requested may be excluded from evaluation.
- c) Tenders are assessed against the Selection Criteria.
- d) Contract costs are evaluated (e.g., tendered prices) and other relevant whole of life costs are considered.
- e) The most suitable Tenderers may be short listed and may also be required to clarify their Tender, make a presentation, demonstrate the service offered and/or open premises for inspection. Referees may also be contacted prior to the selection of the successful Tenderer.

****Note:** Submitted Tender must include rates for each costed Item.

A Contract may then be awarded to the Tenderer whose Tender is considered the most advantageous Tender to the Principal.

The Principal may undertake a risk assessment as to financial capacity and technical capability that tenders are financially viable and have the financial capability to provide the services for which they are submitting and meet their obligations under any proposed Contract. Any financial assessment is specifically for use by the Principal for the purpose of assessing Tenderers and will be treated as strictly confidential.

The Shire of Gnowangerup's Purchasing Policy may affect the selection criteria.

ACCEPTANCE OF TENDER

The Principal shall not be bound to accept any Tender.

The Tender shall be deemed to be accepted when the Principal mails written notification of such acceptance to the successful Tenderer.

SUCCESSFUL TENDERER

The successful Tenderer, within thirty (30) days of receipt of Notice of Acceptance, shall sign a Deed of Contract which shall embody the General Conditions of Contract, Scope of Work, Schedule of Rates and such other documentation which form part of the Contract. If the Deed of Contract is not executed in that time the Principal may, without any notice, terminate the Contract constituted by the acceptance of the Tender.

ALTERNATIVE TENDERS

The schedule of rates is based on pre-selected methodologies based on past experience from the Management team and have provided two (2) options. If the Tenderer has alternative suggestions for carrying out the works, then they may submit an alternative Tender.

All alternative Tenders must be accompanied by a conforming Tender.

INHOUSE TENDERS

The Shire has no intention to bid on this Tender.

DISCLOSURE

Documents and other information relevant to the contract may only be disclosed when required by law under the FOI Act 1992 or under a Court order. Tender price will not be disclosed.

GENERAL CONDITIONS

The WA Local Government Association (WALGA) Minor Works Contract Conditions shall apply to this contract. Copies are available from the Shire of Gnowangerup, 28 Yougenup Road, Gnowangerup, Western Australia.

The law applicable is that of the State or Territory of WESTERN AUSTRALIA

Payments under the Contract shall be made at:	The office of the Principal (Clause 1)
The Principal:	Shire of Gnowangerup (Clause 1)
The address of the Principal:	28 Yougenup Road, Gnowangerup WA 6317
The Superintendent:	Shire Manager of Works, or their delegate

PERIOD OF CONTRACT

The works (Exclusive of sealing and safety fencing) are to be completed by the end of (Insert Date). The anticipated date for sealing will be confirmed prior to work commencing.

The Shire reserves the right to amend, defer or terminate the works during this period with 7 days' notice to the Contractor.

TYPE OF CONTRACT

This Contract shall be a Schedule of Rates and shall not be subject to adjustment for a rise and fall in costs unless agreed to by the Principal.

Any claim for a re-adjustment of the Contract price shall be submitted in writing to the Principal.

Prices Tendered are to include labour, materials, transport, freight, overheads, profits and all other costs as applicable.

REGULATION REQUIREMENTS

The Contractor shall observe and comply with the provision of all relevant acts, ordinances, regulations, by-laws and rules currently in force in the area where the works are to be executed.

CONTRACTORS RESOURCES

Refer 1.6 of the Technical Specification

STANDARDS

Where the requirements of the Contract exceed the requirements of any standard, recommendation, or code of practice whether published or otherwise, the requirements of the Contract shall take precedence.

PAYMENT TO CONTRACTOR

The Contractor is to submit an invoice for works completed to the Shire, if registered or required to be registered for GST, a valid tax invoice for execution of the service under this Contract for the amount as agreed to by the Principal. This tax invoice shall accompany delivery of the service under this Contract. The Principal shall, within 30 days of receipt of a valid tax invoice and upon verification of the quality and suitability of the service, pay the Contractor the agreed sum.

The Contractor must quote their valid Australian Business Number (ABN) on all invoices sent. Failure to quote the Contractors ABN will result in the Shire withholding the equivalent of the top marginal rate of tax, including the Medicare Levy, from the Contract payment (48.5%).

If the Contractor is not required to quote an ABN, then the Principal must receive written confirmation of this before payment is made.

OCCUPATIONAL SAFETY & HEALTH

The Contractor shall comply with all Occupational Safety and Health Act guidelines currently in force.

INDEMNITY BY CONTRACTOR

The Contractor shall indemnify the Principal against:

- a) loss of or damage to property of the Principal, including existing property in or upon which the work under the Contract is being carried out; and
- b) claims by any person against the Principal in respect of personal injury or death or loss of or damage to any property, arising out of or as a consequence of the carrying out by the Contractor of the work under the Contract.

INSURANCE

Before the Contractor commences work, the Contractor shall take out an insurance policy in accordance with Clause 24, The WA Local Government Association (WALGA) Minor Works Contract Conditions covering against loss or damage resulting from any cause whatsoever. The policy will be maintained for the duration of the Contract.

Proof of this insurance shall be provided to the Principal prior to commencing works. Failure to supply this proof may result in rejection or termination of Contract.

PUBLIC LIABILITY

Before the Contractor commences work, the Contractor shall take out a Public Liability Policy of insurance in accordance with Clause 24, The WA Local Government Association (WALGA) Minor Works Contract Conditions in the joint names of the Principal and the Contractor which covers the Principal, the Contractor, the Superintendent and all sub-contractors employed from time to time in relation to the work under the Contract for their respective rights and interests and cover their liabilities to third parties.

The Contractor shall have and maintain Public Liability insurance for the duration of the Contract for the amount of \$20,000,000 (20 million dollars) as minimum.

INSURANCE OF EMPLOYEES

Before commencing work, the Contractor shall insure against liability for death of or injury to persons employed by the Contractor including liability by statute and at common law. The insurance cover shall be maintained for the duration of the Contract.

The insurance shall be extended to indemnify the Principal for the Principal's statutory liability to persons employed by the Contractor.

The Contractor shall ensure that every sub-contractor is similarly insured.

SCOPE OF WORKS

This specification and the Tieline Road Tender Technical Specification, describes the work and sets out the general requirements that are not covered elsewhere in the Contract Documents.

It is anticipated the Contractor will commence works at Slkm 36.29 and work in decreasing Slkm.

DESCRIPTION OF WORK:

The Contractor shall provide suitably qualified machine operators to undertake the work to an agreed standard including but is not limited to the following:

- a) Rehabilitation of existing shoulder gravel by importing, blending and finishing the gravel surface to specification ready receive the seal coat application (3.5+0.3m sealed shoulders = 7.6m total seal width);
- b) Blending into existing intersections and side roads, existing carriageway and existing drains;
- c) Removal and Reinstallation of regulatory signs, permanent warning signs and guide posts; and
- d) Provide qualified traffic control for the duration of the project.

MATERIALS

Gravel Material

The Shire will provide access to nominated gravel pit at the (Proposed site: SLK 20.93, 500 metres south on Tieline Road) as shown below.

Distance from the gravel pit is

- 18 Km lead for the furthest section of Works

Contractor is to process (or condition), load and transport the gravel required for the project. An agreed area/stockpile is to be measured jointly with shire staff before commencement of work. Contractor is to use "due diligence" with the quantity of gravel and the Shire is not accountable for extra materials used.

Water

The Contractor is to source water for the works from property owners along the Tieline Road area.

Limited water is available from the Shire Standpipe within Gnowangerup Townsite, for finishing works only. Contact Manager of Works for location and authority to access.

GENERAL

1.1 Scope

This specification describes the work and sets out the general requirements that are not covered elsewhere in the Contract Documents.

1.2 Description of Work:

The work involves seal widening but is not limited to:

- Rehabilitation of shoulders and widening of the existing seal (6.4 metres) with degraded shoulder pavement to a 7.0m seal with 1.2m wide shoulders (0.8m sealed and 0.4m unsealed);
- It is anticipated the works will start from SLK 36.29 and progress in reducing SLK;
- Reconstruction of and blending into existing intersections and side roads, existing crossovers and existing drains; and
- Removal / re-installation of permanent warning signs and guide-posts.

1.3 Location

The Works are located on Tieline Road (SLK28.00 to SLK36.59) within the Shire of Gnowangerup.

1.4 Drawings

The typical drawing in Appendix 1 form part of the Contract Documentation:

1.5 Standard of Work

All materials and workmanship used in the execution of the Contract Works shall comply with the requirements of the Drawings, Specifications and nominated standards.

1.6 Workplace safety

All work shall be carried out with due regard for the safety of employees and the general public and in compliance with all relevant Acts and Regulations.

The Contractor shall comply with the Occupational Safety and Health Act 1984 and the Occupational Safety and Health Regulations 1996 and any amendments that may be made.

The Contractor shall conduct site inductions for all employees and sub-contractor's employees to make them aware of all potential hazards and take measures to minimise accidents.

The Contractor shall refer to WorkSafe WA for Codes of Practice relating to specific matters such as, but not limited to, First Aid, Workplace Amenities and Excavations.

1.7 Plant and Equipment

The Contractor shall supply all plant and equipment necessary to carry out the works and shall not remove from the site any plant and equipment, which will hinder or delay the progress of the work, without the written approval of the Principals' Representative.

Plant shall be of adequate capacity and rating to carry out work specified. The Contractor shall remove from the work any plant or equipment considered by the Principals' Representative to be unsuitable for carrying out the work in accordance with the specification.

If at any time during the progress of the Works, plant, equipment or labour appear to the Principals' Representative to be insufficient, inefficient or inappropriate to secure the quality of work required, or the proper rate of progress, the Principals' Representative may direct the Contractor, at the Contractor's cost, to remove all abovementioned deficiencies to bring the project back on track and quality up to standard.

1.8 Contractor's Programme

The Contractor shall submit to the Principals' Representative, within one week from acceptance

of tender, a Construction Programme detailing:

- Start and completion dates for each main activity or task such as clearing, earthworks, drainage, pavement construction, sealing and so on.

The Contractor shall review and update the programme weekly.

1.9 Additional Information/Instruction

The Contractor shall give immediate notice of any instruction or clarification required from the Principal if such instruction or clarification is needed to avoid delaying the works.

1.10 Inspections (HOLD POINTS)

The Contractor shall contact the Principals' Representative to arrange joint inspections at the completion stage.

Work is not to proceed past this HOLD POINT, until approval is given by the Principals' Representative. Failure to do so may result in rework by the Contractor.

Inspections are required at the following stages:

1.10.1 Completion of Shoulder pavement layer.

1.10.2 Practical Completion.

1.11 Survey Control and Setting Out

1.11.1 General

The Contractor shall use simple controls measures to ensure the crossfall shape has the continuity to the existing pavement crossfall.

The Contractor shall ensure the current pavement widths are maintained.

1.12 Dimensions and Existing Conditions

The Contractor is responsible for checking all pertinent dimensions and existing conditions on or about the site before commencement of work. Any work component shown on the drawings but not included in this Specification or included in this specification but not shown on the drawings, shall be deemed to be part of the Contract.

1.13 Water Supply

The Contractor shall make all necessary arrangements and pay all costs associated with the supply of suitable water for construction purposes.

The Contractor shall be responsible for investigating the feasibility and availability of suitable water for the works. Potable water is not to be used for general construction purposes.

The Contractor shall comply with any water restrictions imposed by the Water Corporation.

1.14 Traffic Control

1.14.1 General

The Contractor is responsible for all traffic management measures relating to the Contract Works. The traffic management measures required for the Contract Works may include lane closures, traffic diversions, signage, other temporary measures and public communication. The Contractor must supply all traffic control devices, including signs, lights, cones and barricades, and erect and maintain all such devices in good condition for the duration of the works. The Contractor must provide MRWA accredited Traffic Controllers as required to ensure the safety of motorists, road users and workers.

1.14.2 Standards and Code Practice

All work and traffic control measures must be performed in accordance with the following Code of Practice and Australia Standards:

1.14.2.1 MRWA Traffic Management for Roadwork's, 2022 Code of Practice

1.14.2.2 AS 1742.3 – 2019 Manual of Uniform Traffic Control Devices Part 3 – Traffic Control for Works on Roads

1.14.3 Traffic Management Plans

The Contractor is responsible for preparation, implementation and auditing of a Traffic Management Plan.

The Traffic Management Plan(s) must be prepared by an accredited person and submitted to the appropriate road controlling authority and Principals' Representative five days prior to the proposed commencement of works.

The Principals' Representative and road controlling authority may review, amend, direct or take whatever steps considered necessary to properly provide for the safety of road users and others.

1.14.4 Indemnity

The Contractor shall indemnify the Principal against all claims, demands, proceedings, costs and expenses incurred in consequence of any actions arising out of claims by a third party in respect to traffic control matters.

1.15 Working Days and Hours

Normal working days are Monday to Friday and do not include Saturdays, Sundays and Public Holidays.

Normal working hours are between 7.00am and 6.00pm but for the purpose of variations and extensions of time to the Contract shall consist of 8 hours per working day.

Where the Contractor considers it essential to work outside normal working hours or normal working day he must request in writing prior approval from the Principals' Representative and this approval, if granted, shall not be construed as a variation.

For the purpose of Liquidated Damages assessment, a day will mean any 24 consecutive hour day including Saturdays, Sundays and statutory holidays.

1.16 Haulage Routes

1.16.1 Maintenance

Haulage routes shall be managed and maintained to minimise the impact on the property owners and road users.

Haulage routes may be inspected by the Principals' Representative to record the current standard of the road prior to commencement of hauling.

Any subsequent deterioration of roads, drainage or other road assets other than general wear and tear shall be repaired at the Contractors expense.

1.16.2 Suspension of Cartage on Haulage Routes

The road controlling authority may direct suspension of cartage on haulage routes for a period when wet weather or other adverse weather conditions affecting the road surface or drainage that could compromise public safety, property and road integrity.

If work cannot proceed on other activities, the time for suspension of the Contract shall be extended by the cumulative total of all periods of cessation of work directed by the Principals' Representative which are within the specified working hours.

1.17 Working Methods

The Contractor shall adopt orderly road construction working methods including:

- a) Traffic Management.
- b) Shoulder Rehabilitation.
- c) Basecourse Construction

The haul routes shall be marked and traffic controlled onto these routes.

The Contractor shall be responsible to control dust and shall adjust his working methods as necessary to maintain any dust within the limits prescribed by the Environmental Protection Agency.

The Contractor shall at all times comply with all statutes, regulations and by-laws relating to the protection of the environment.

1.18 Cessation of Work/Stand down of Resources

In addition to 1.7 of this Technical specification, the Principals' Representative may direct the Contractor to cease operations and stand-down all resources for events including, but not limited to; excessive dust due to wind, total fire bans imposed by Department of Fire and Emergency Services, or directions by Authorities. Extensions of time will be granted for such stand-downs.

If applicable and where directed by the Principals' Representative during the period of cessation of work, the Contractor shall continue to operate the dust suppression measures specified and endeavour to suppress dust as much as possible.

During the period of cessation of work the Contractor shall keep all machinery and supplies on site and maintain his capability to restart work at the first opportunity.

The time for completion of the Contract shall be extended by the cumulative total of all periods of cessation of work directed by the Principals' Representative which are within the specified working hours.

1.19 Adjacent Properties / Residences

The Contractor shall ensure particular attention is given to plant, equipment and manpower operations so as to avoid causing a nuisance to adjacent residences due to the works. The contractor shall be fully responsible for any damage caused, particularly damage that may be caused by plant and equipment. All domestic rubbish is to be contained within site rubbish containers and not contaminate the roadside.

The Principal may arrange for the repair of damage not made good by the Contractor and the cost of such repair will be deducted from payments due to the Contractor.

DAMAGED AREAS

2.0 Damaged vegetation

The Contractor shall take precautions to prevent any damage to vegetation, trees, shrubs, grassed areas, fences and other improvements outside the areas nominated to be worked.

In the event of any damage to vegetated areas outside the clearing areas, the Contractor shall make good, at its own cost, as directed by the Principal.

EARTHWORKS

2.1 General

Earthworks includes all excavation, trenching, filling, compaction and trimming as necessary to complete the topsoil removal and replacement, embankments, subgrade, table drains, drainage channels and batters to the shapes and levels specified or as shown on the drawings.

2.2 Extent of Work

The extent of work involves:

- The importing of Basecourse top-up material where required;
- Final trim of shoulders and back slopes to the side drains where applicable; and
- The Contractor is responsible for the assessment of the material nominated for Basecourse and to select suitable plant and resources, which will achieve the specified results.

This Contract is a lump sum and the amount tendered shall include the cost of excavation of replacement of unsuitable in the shoulders.

Selected basecourse shall be supplied by the Principal (Refer Appendix 2).

3.0 Testing

3.1 General

The Contractor is responsible for the production of a suitably prepared product that will meet the required specified dense, tightly bound surface ready for receiving a bituminous seal coat.

All costs for this testing shall be incorporated in the lump sum contract.

3.2 Finish

All earthworks shall be final graded to the finished presentation stage including:

- 3.2.1 evenly graded changes between design levels/contours;
- 3.2.2 all wheel tracks and other disturbances levelled out; and
- 3.2.3 removal of all debris or rock pieces greater than 100mm in any direction from the surface;

4.0 Setting Out

The shire has provided a simple centre line with offset pegs.

The Contractor shall conduct simple survey/measurement control methods to ensure alignment and shape is achieved.

ROADWORKS

5.0 General

The work to be completed under this specification consists of the delivery of materials to site. The construction of a processed basecourse shoulder pavement layer.

5.1 Australian Standard

All workmanship and materials used in the Works shall conform to the current Australian Standard where such Standard exists. Where such Standard does not exist the current Authority's Standard shall apply.

5.2 Material

Shoulder Base course materials are a Principal Supplied product. The pit is located off Tieline Rd. Diagram Appendix 2

5.2.1 Shoulder Construction

The existing seal edge is to be cut where needed to achieve a straight line.

The shoulder area is to be "Topped up" with basecourse gravel, then suitably worked and compacted as per specification.

The shoulder materials are to be worked and the ripped material may be re-blended

with new shoulder base course gravel.

The shoulder materials shall be thoroughly mixed on the alignment to achieve uniformity of compacted using static and vibratory rollers and finished with steel wheel and ballasted rubber tyre rollers.

5.2.2 Finish Surface

Completed pavement layers shall be in a uniformly bound condition with no evidence of layering or disintegration. The finished surface shall be of dense, even texture and tightly bound.

Watering shall be continued only as necessary to prevent shrinkage cracking, dusting or loosening of the surface to the date of sealing.

5.2.3 Tolerances

(i) Sub-base Width

The outer top edge of the sub-base layer shall not be less than the specified width and no more than 300 mm further from the road centreline than the positions shown in the drawings.

(ii) Surface Shape

The shape of the shoulder surface shall be judged to be acceptable when the maximum deviation from a 3 metre straight edge placed in any position on the surface does not exceed 10mm.

(i) Crossfall

The crossfall shall be conforming when if measured at any point along the existing seal surface, is within -2% - +1% of the existing sealed crossfall.

BITUMINOUS SURFACING

5.3 Primer seal

The Shire of Gnowangerup will undertake the sealing of the shoulders on completion of the works.

The completed surface will be maintained in conforming condition to the date of the sealing works.

TRAFFIC FACILITIES

5.4 Signage

The Contractor shall at a minimum remove for safe keeping and then reinstall all existing signs. Any reinstallation of existing signage shall be undertaken in conformance with Main Roads WA Specification 601 - Signs (available via the MRWA website).

5.5 Guide-Posts & Culvert Markers

The Contractor shall remove all existing guide-post and install new flexible guide posts as per Main Roads WA Specification 602 - Guide Posts (available via the MRWA website). Guide-posts manufactured from plastic are not to be used.

Appendix 1 Typical Drawing

Allow 100mm overlap Seal to ensure 3.5m lane width plus .6m sealed Shoulder

Appendix 2 Gravel pit location
