

<b>4.</b>	<b>INFRASTRUCTURE UPDATE &amp; ASSET AND WASTE MANAGEMENT COORDINATOR REPORT</b>
<b>Location:</b>	Shire of Gnowangerup
<b>Proponent:</b>	N/A
<b>Date of Report:</b>	8 July 2022
<b>Business Unit:</b>	Infrastructure
<b>Officer:</b>	Geoff Carberry - Asset and Waste Management Coordinator
<b>Disclosure of Interest:</b>	Nil

Gravel resheeting of Toompup Road completed. Resheeting of Corackerup Road was cancelled due to weather conditions. All other funded and Council projects have been completed.

Water damaged was sustained to Jackitup Road, Jackitup Road North, Foster Road, Parker Road and Toompup South Road as a result of a sudden heavy rain event on 17/6/2022. With the exception of Jackitup Road most was caused by drainage issues resulting in scouring of the roads. On Jackitup Road the culvert rock wall was washed out exposing the pipe. The same event caused water to breach Kowbrup Road, Tie Line Road and the main roads through to Jerramungup in numerous places.

After this event the Ongerup Playgroup relocation committee requested assistance to establish the cause of the flooding of the new playground. It was established that drainage had not been installed when the soil level was lowered to accommodate the sand pit, also the excess material outside of the fence directed the water towards the playground area.

A total of 232 hours of maintenance grading was carried out with the following roads being graded. Eastwood Road, Jackitup Road West, Strathaven Road, Airport Road, Glengarry Road, Cambellup Road, Palinup Road, Willeminup Road, Xmas Farms Road, Hart Road, O'Neil Road, Foster Road, Tie Line Road, Salt River Road, Hobbs Road, Salt River Road and North Stirling Road. In addition to the grader mounted rollers an additional multi tyre roller was used behind two of the graders.

Further tree pruning works and vegetation clean ups were carried out in all three towns.

Drainage works were carried out at the Ongerup Complex due to tree roots blocking the storm water outlet.

Ongerup Sewer system was inspected camera, as is required by our licence. Several areas required jetting to remove tree roots and sand deposits. One hole was found in the top of a pipe near the school. One disturbing find was a snake within the pipe work, how it got into the network is still to be established. One section of pipe work requires further investigation to establish the cause of a high level of inflow.

Contract gutter cleaning of all Shire buildings was completed.

Replacement of the carpet in the Medical Centre passageway with vinyl and the installation of new vinyl in main consultation room was carried out.
